For further details on product installation, see the complete Installation Manual.

DS2200 can be configured through the WinHost Windows-based software program available on the installation CD-ROM.

For configuration it is necessary to create a cable connecting the scanner to the PC as indicated in the "How To Build A Simple Interface Test Cable" section of this guide.

Power Supply:

- This product is intended to be installed by Qualified Personnel only.
- **DS2200 All Models:**
This device is intended to be supplied either by a UL Listed NEC Class 2 power source, or a UL listed ITE Limited Power Source (LPS), rated 5Vdc, minimum 0.4A.

Laser Safety:

The scanner is classified as a Class 2 laser product according to EN 60825-1 regulations and as a Class II laser product according to CDRH regulations.

For installation, use and maintenance it is not necessary to open the device.

There is a safety device which allows the laser to be switched on only if the motor is rotating above the threshold for its correct scanning speed.

The laser beam can be switched off through a software command (see also the WinHost Help On Line).

Warning and device class labels

The laser diode used in this device is classified as a class 3B laser product according to EN 60825-1 regulations and as a Class IIIB laser product according to CDRH regulations. As it is not possible to apply a classification label on the laser diode used in this device, the following label is reproduced below.

Laser diode class label

Any violation of the optic parts in particular can cause radiation up to the maximum level of the laser diode (7 mW at 630 to 680 nm).

Electrical Connections:

DS2200 is equipped with a cable terminated by a 25-pin female D-sub connector for connection with the power supply and input/output signals.

Do not connect GND and SGND to different (external) ground references. GND and SGND are internally connected through filtering circuitry which can be permanently damaged if subjected to voltage drops over 0.8 Vdc.

The details of the connector pins are indicated in the following table:
