Maximum Versatility. Easy Installation.

Get reliable performance without compromise. SM Series Lube-Free Air Motors from Ingersoll Rand® perform more cleanly and consistently than traditional air motors, preventing oil contamination in sensitive manufacturing facilities where lubricants must be strictly avoided. Lube-Free operation reduces air consumption compared to competition and minimizes downtime – making maintenance quick and cost-effective. The self-regulating cooling system maintains optimal temperatures even in hot or humid environments. Easy throttling and quick response times ensure instant start and stop, while the auto-stop mechanism protects the motor in the event of overload.

SM Series Lube-Free Air Motors deliver a higher power-to-weight ratio than competition, and installation is easy with versatile mounting options (Foot, Flange, Hub, and NEMA). ATEX- and CE-certified for operation in hazardous locations.
