

Owner's Manual Box and Pan Brake

Models: BP-1648H, BP-2248H

WALTER MEIER (Manufacturing) Inc.

427 New Sanford Road LaVergne, Tennessee 37086 Ph.: 800-274-6848 www.waltermeier.com

Warranty and Service

Walter Meier (Manufacturing) Inc., warrants every product it sells. If one of our tools needs service or repair, one of our Authorized Service Centers located throughout the United States can give you quick service. In most cases, any of these Walter Meier Authorized Service Centers can authorize warranty repair, assist you in obtaining parts, or perform routine maintenance and major repair on your JET⊚tools. For the name of an Authorized Service Center in your area call 1-800-274-6848.

MORE INFORMATION

Walter Meier is consistently adding new products to the line. For complete, up-to-date product information, check with your local Walter Meier distributor, or visit waltermeier.com.

WARRANTY

JET products carry a limited warranty which varies in duration based upon the product (MW = Metalworking, WW = Woodworking).

WHAT IS COVERED?

This warranty covers any defects in workmanship or materials subject to the exceptions stated below. Cutting tools, abrasives and other consumables are excluded from warranty coverage.

WHO IS COVERED?

This warranty covers only the initial purchaser of the product.

WHAT IS THE PERIOD OF COVERAGE?

The general JET warranty lasts for the time period specified in the product literature of each product.

WHAT IS NOT COVERED?

Five Year Warranties do not cover woodworking (WW) products used for commercial, industrial or educational purposes. Woodworking products with Five Year Warranties that are used for commercial, industrial or education purposes revert to a One Year Warranty. This warranty does not cover defects due directly or indirectly to misuse, abuse, negligence or accidents, normal wear-and-tear, improper repair or alterations, or lack of maintenance.

HOW TO GET SERVICE

The product or part must be returned for examination, postage prepaid, to a location designated by us. For the name of the location nearest you, please call 1-800-274-6848.

You must provide proof of initial purchase date and an explanation of the complaint must accompany the merchandise. If our inspection discloses a defect, we will repair or replace the product, or refund the purchase price, at our option. We will return the repaired product or replacement at our expense unless it is determined by us that there is no defect, or that the defect resulted from causes not within the scope of our warranty in which case we will, at your direction, dispose of or return the product. In the event you choose to have the product returned, you will be responsible for the shipping and handling costs of the return.

HOW STATE LAW APPLIES

This warranty gives you specific legal rights; you may also have other rights which vary from state to state.

LIMITATIONS ON THIS WARRANTY

WALTER MEIER (MANUFACTURING) INC., LIMITS ALL IMPLIED WARRANTIES TO THE PERIOD OF THE LIMITED WARRANTY FOR EACH PRODUCT. EXCEPT AS STATED HEREIN, ANY IMPLIED WARRANTIES OR MERCHANTABILITY AND FITNESS ARE EXCLUDED. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG THE IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

WALTER MEIER SHALL IN NO EVENT BE LIABLE FOR DEATH, INJURIES TO PERSONS OR PROPERTY, OR FOR INCIDENTAL, CONTINGENT, SPECIAL, OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OF OUR PRODUCTS. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

Walter Meier sells through distributors only. The specifications in Walter Meier catalogs are given as general information and are not binding. Members of Walter Meier reserve the right to effect at any time, without prior notice, those alterations to parts, fittings, and accessory equipment which they may deem necessary for any reason whatsoever. JET® branded products are not sold in Canada by Walter Meier.

Breakdown for BP-1648H & BP-2248H Box & Pan Brake	7

The specifications in this manual are given as general information and are not binding. Walter Meier (Manufacturing) Inc., reserves the right to effect, at any time and without prior notice, changes or alterations to parts, fittings, and accessory equipment deemed necessary for any reason whatsoever.

- 1. Keep guards in place and in working order.
- 2. Keep all body parts away from moving parts. Avoid placing any part of your body near belts, cutters, gears, etc.
- 3. Do not exceed rated capacity on this brake.
- 4. Keep the work area clean. Cluttered areas and workbenches invite accidents.
- 5. Keep children away. All visitors should be kept a safe distance from the work area.
- 6. Make your workshop child proof with padlocks, master switches or by removing starter keys.
- 7. Don't force the machine. It will do the job better and safer at the rate for which it was designed.
- 8. Use the right machine. Don't force a machine or attachment to do a job for which it was not designed.
- Wear proper apparel. Do not wear loose clothing, gloves, neckties, rings, bracelets, or other jewelry, which may get caught in moving parts. Non-slip footwear is recommended. Wear protective hair covering to contain long hair.
- 10. Always use safety glasses. Also use face or dust masks if the cutting operation is dusty. Everyday eyeglasses only have impact resistant lenses; they are not safety glasses.
- 11. Don't overreach. Keep proper footing and balance at all times.
- 12. Maintain tools with care. Keep tools sharp and clean for the best and safest performance. Follow instructions for lubricating and changing accessories.
- 13. Never stand on a machine. Serious injury could occur if the machine tipped.
- 14. Check damaged parts. Before further use of the machine, a guard or other part that is damaged should be carefully checked to determine that it will operate properly and perform its intended function check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.
- 15. Sheet metal stock has sharp edges. To prevent cuts, use caution when handling.
- 16. Keep hands and fingers clear of the area in front and rear of the brake.
- 17. Do not use the machine for any purpose other than for which it was designed
- 18. Failure to comply with all of these warnings may cause serious injury.
- 19. Some dust created by power sanding, sawing, grinding, drilling and other construction activities contains chemicals known to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are:
- Lead from lead based paint
- Crystalline silica from bricks and cement and other masonry products, and
- Arsenic and chromium from chemically treated lumber.

Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specifically designed to filter out microscopic particles.

20. Do not operate tool while under the influence of drugs, alcohol or any medication.

Specifications

Model Number	BP-1648H	BP-2248H
Stock Number	752116	752122
Capacity (mild steel)	16 gauge	22 gauge
Bending Length Capacity		
Maximum Box Depth	4"	3"
Maximum Lift of Beam	1-1/4"	7/8"
Beam Adjustment	5/8"	1/8"
Number of Fingers and Width	5@2", 6@3", 5@4"	5@2", 6@3", 5@4"
Finger Nose Angle	45	45
Finger Nose Radius	1/32"	
Overall Dimensions (LxWxH)	61" x 21" x 30"	61" x 21" x 28"

Uncrating and Clean-Up

- 1. Remove the crate from around the machine.
- Carefully clean all rust protected surfaces with a mild solvent or kerosene and a soft rag. Do not use lacquer thinner, paint thinner, or gasoline. These will damage painted surfaces.
- 3. Coat all machined surfaces with a light coat of oil to inhibit rust.
- Remove the bolts holding the machine to the skid.
- 5. Carefully move the machine to a well-lighted area on a solid, level workbench, and secure to the bench with lag screws or bolts.
- Machine location must allow access to all sides.

Brake Setup

The brake will not bend properly if it is not level. Use a machinist's level and shims if necessary.

Apron Adjustments

The (#) in the text refers to the breakdown.

The apron assembly has been adjusted at the factory for proper use of capacity material. During shipment of this unit the machine may have come out of alignment.

The forward edge of the holddown fingers (58, 59 & 60) should be adjusted parallel to the pivot edge of the clamp block. Release clamping pressure on the holddown assembly by pushing clamp handles slightly to the rear. Turn the hex cap screws (64) to adjust for parallel.

The center of the apron can be adjusted by tightening the truss nut on the apron assembly.

Finger alignment can be achieved by loosening all socket head cap screws (57) and rotating the apron (903) to the 90-degree position. This will align fingers. Tighten screws (57).

Operating the Brake

Adjusting for Metal Thickness

The holddown assembly must be adjusted to allow for clearance when making bends according to the thickness of the material. Clearance for material within four gauges of the capacity should be twice the thickness of the material. For lighter gauges use 1-1/2" times the thickness. The forward edge of the holddown fingers should be adjusted parallel to the pivot edge of the clamp block. Release clamping pressure on the holddown assembly by pushing clamp handles (42 & 43) slightly to the rear. Turn the hex cap screws (64) to adjust for parallel and proper clearance. The center of the holddown can be adjusted by tightening the truss nut on the holddown assembly.

Adjusting the Clamping Pressure

The clamping pressure should be adjusted according to the thickness of the material. The clamping pressure should be great enough to hold the material securely in place but not so much that it is difficult to lock the clamping handles. Clamping pressure can be adjusted by turning the lower nuts (54) on the threaded rod portion of the yoke assembly (47 & 48).

Flange Capacity

The recommended minimum flange in capacity material is one inch.

Repeat Bends

Adjust the stop (81) on the stop rod (69) to limit the swing of the apron assembly.

Counter Weight

The counter weight (68) can be moved up or down to provide more or less leverage.

Lubrication

The machine must be lubricated every day of service with a few drops of oil. Oil pinholes are located at both yoke assemblies (47 & 48), and the apron assembly near the hinge pin (53). Lightly oil the machined parts when not in use to prevent rust.

Ordering Replacement Parts

To order parts or reach our service department, call 1-800-274-6848 Monday through Friday (see our website for business hours, www.waltermeier.com). Having the Model Number and Serial Number of your machine available when you call will allow us to serve you quickly and accurately.
