VERSATILITY

The QX Series is a family of cordless, portable and multi-functional precision fastening tools that allow for fast programming when there are changes on your line. Featuring both pistol and angle wrench models with offerings from 0.8–80nm, the QX series is as versatile in form as it is function.

COMFORT

A tool designed for speed and efficiency, it reduces rework and lowers costs. It's compact and ergonomically balanced. And the cordless design makes it safer to operate in the industrial environment, allowing no cords or hoses to get in your way or contaminate your product with oil or other debris.

COMMUNICATION

Featuring a Wireless Communication option facilitated by Ingersoll Rand's dedicated PCM Module, you'll be able to integrate the tool and the assembly line into a true plant-wide network with managed data, process control and the ability to adjust tool configurations in real time.
