

**KDS SCREWDRIVERS**

**Torque range: 0.1 - 70 Nm**

# **OPERATOR MANUAL**

## **IDENTIFICATION DATA OF THE MANUFACTURER**

KOLVER S.r.l.  
VIA M. CORNER, 19/21  
36016 THIENE (VI) ITALIA

## **TECHNICAL DATA OF THE PRODUCT**

DIMENSIONS: 254 x 40 mm  
WEIGHT: 0,7 Kg  
VOLTAGE: 40V DC  
POWER: 600W  
NOISE LEVEL: < 70 dB(A)  
VIBRATION LEVEL: < 2.5 m/s<sup>2</sup>

## **DECLARATION OF CONFORMITY**

KOLVER S.r.l. declares that the new tool here described: screwdrivers KDS series (see table) are in conformity with the following standards and other normative documents: 2006/42/CE, LVD 2014/35/UE, EMCD 2014/30/UE, EN 62841-2-2:2014, EN 62841-1: 2015, EN 60204-1, EN 61000-6-2, EN 61000-6-4.

It is also in conformity with RoHS III normative (2011/65/UE and following 2015/863).

## **DECLARATION OF USE**

Screwdriver (class I) suitable for industrial environment only. It shall be used for tightening. No other use will be permitted. For professional use only.

**WARNING:** To reduce the risk of injury, before using or servicing screwdriver, read and understand the following information as well as separately provided safety instructions (item code: 0MS000). The features and descriptions of our products are subject to change without prior notice.

### **DECLARATION OF NOISE AND VIBRATION EMISSION**

NOISE LEVEL: < 70 dB(A)

VIBRATION LEVEL: < 2.5 m/s<sup>2</sup>

These declared values were obtained by laboratory type testing in compliance with the stated standards and are not adequate for use in risk assessments. Values measured in individual work places may be higher than the declared values. The actual exposure values and risk of harm experienced by an individual user are unique and depend upon the way the user works, the work piece and the workstation design, as well as upon the exposure time and the physical condition of the user. We, KOLVER, cannot be held liable for the consequences of using the declared values, instead of values reflecting the actual exposure, in an individual risk assessment in a work place situation over which we have no control.

### **OPERATING MODE**

The screwdriver can be manual or used as fixed spindle on an automatic machine.

### **CONTROL UNIT**

Power source by KDU 1 series, depending on the model.

### **MAINTENANCE INSTRUCTIONS**

Maintenance should be performed by qualified personnel only.

- Prior to any maintenance task: disconnect the screwdriver.
- When disassembling / reassembling the screwdriver, take the following precautions:
  - Check that the controller is switched off.
  - Disconnect the cable.

According to Directive 2012/19/EU concerning Waste Electrical and Electronic Equipment (WEEE), this product must be recycled.

## INSTALLATION OF KDS SCREWDRIVER

### Cable connection and part numbers

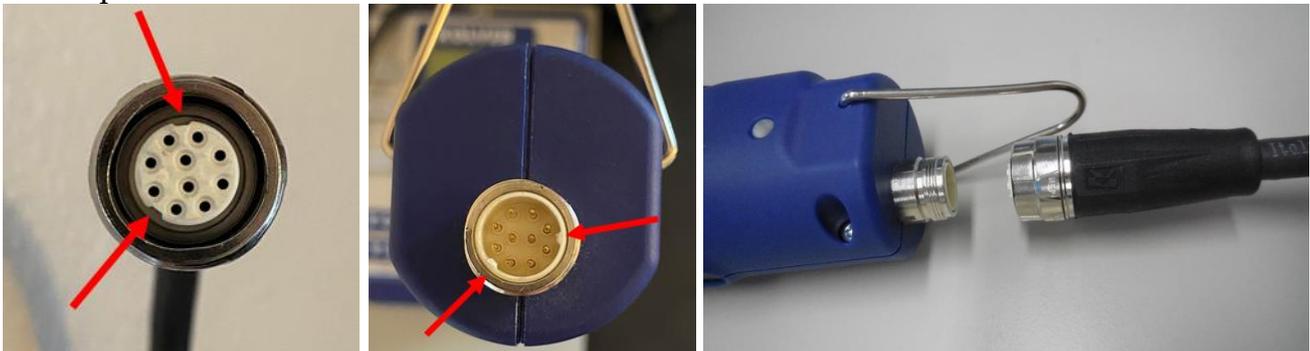

The KDS screwdriver series require one of the following cables:

- 2.5m male/female cable (code 250064)
- 2.5m male/female cable with strain relief (code 250064/H)
- 5.0m male/female cable (code 250564)
- 5.0m male/female cable with strain relief (code 250564/H)

To connect the screwdriver to the unit:

1. insert the male connector into the appropriate TOOL connector on the bottom of the unit, taking care to respect the alignment tabs. Push the connector into its position and turn the OPEN/CLOSE nut\* clockwise.
2. insert the female connector into the appropriate connector at the top of the screwdriver, taking care to respect the alignment tabs. Push the connector into its position and turn the OPEN/CLOSE nut\* clockwise.

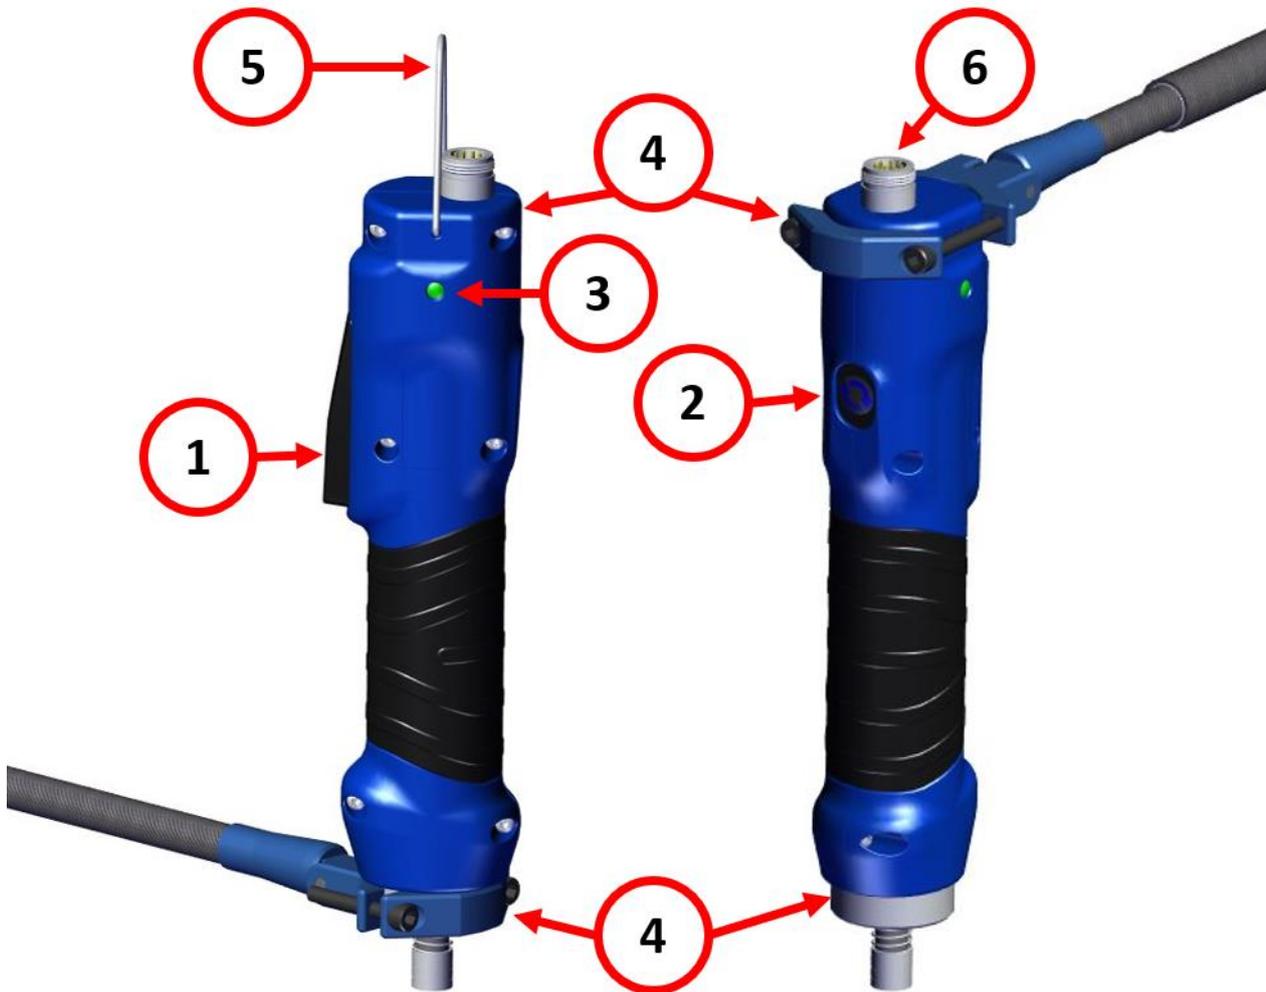

To disconnect the cable:

1. lightly push the connector in towards the screwdriver (or the unit)
2. turn the OPEN/CLOSE nut\* counterclockwise
3. pull the connector out

\*note: some models use a threaded nut instead of an OPEN/CLOSE nut. In this case, tighten the nut all the way until it stops, without overtightening with excessive force.

## OPERATING THE KDS SCREWDRIVER

### (1) Lever

Press and hold the lever to initiate a rundown.

The screwdriver will automatically stop according to the configured program, in either an OK or a NOK state, depending on the success of the rundown.

The screwdriver will also stop if the lever is released in the middle of the rundown, and either return to the READY state or raise the NOK state if the LEVER ERROR option is active for the current program (Programs menu > Other > LEVER ERROR).

### (2) Reverse button

Press and hold the button to initiate a defix run, rotating in the opposite direction of the selected direction of rotation for the lever (see Programs menu > Other > ROTATION).

The behavior of the reverse button can be changed from the general settings menu (General Settings > REVERSE BUTTON).

### (3) LED

The two LEDs indicate the state of the screwdriver:

●	Blinking white: the screwdriver was just connected to the K-Ducer control unit
●	Off: the screwdriver is ready, or the screwdriver is not connected
●	Solid green: the last screw result was OK
●	Solid red: the last screw result was NOK
●	Solid blue: screwdriver is running in the tightening direction, either via the lever or via remote control
●	Solid purple: the screwdriver is running in the de-fix direction, either via the reverse button, or via remote control
●	Blinking purple: the reverse button is in switch mode and is activated. The screwdriver is ready to run in de-fix rotation via the main lever.

#### (4) Reaction arm connections

Fix the reaction arm to one these areas only, and never anywhere else on the screwdriver. Kolver recommends using a reaction arm for operator comfort, especially for applications with torques above 5 Nm.

The KDS series screwdriver has two positions designed for connecting to the reaction arm:

1. The naked metal cylinder near the head of the screwdriver
2. The reinforced plastic section at the very top of the screwdriver
  - **NOT** present on KDS-PL20-35-50
  - **NOT** present on the the pistol-shaped versions

**Warning:** do not connect the reaction arm anywhere other than the above designated areas. Fixing the reaction arm to the middle of the screwdriver handle will squeeze the screwdriver shell, causing damage to the internal components, and failing to absorb the torque reaction safely and reliably.

#### (5) Hanging hook

To hang the screwdriver somewhere easily accessible in the operator's workbench.

#### (6) Female connector

To connect the screwdriver to the K-Ducer control unit

## SCREWDRIVER VARIANTS AND ACCESSORIES

### Pistol screwdrivers

Reaction arm connection:

START / REVERSE button and LEDs are on the back of the screwdriver:

Status LED also found front facing on the top of the screwdriver:

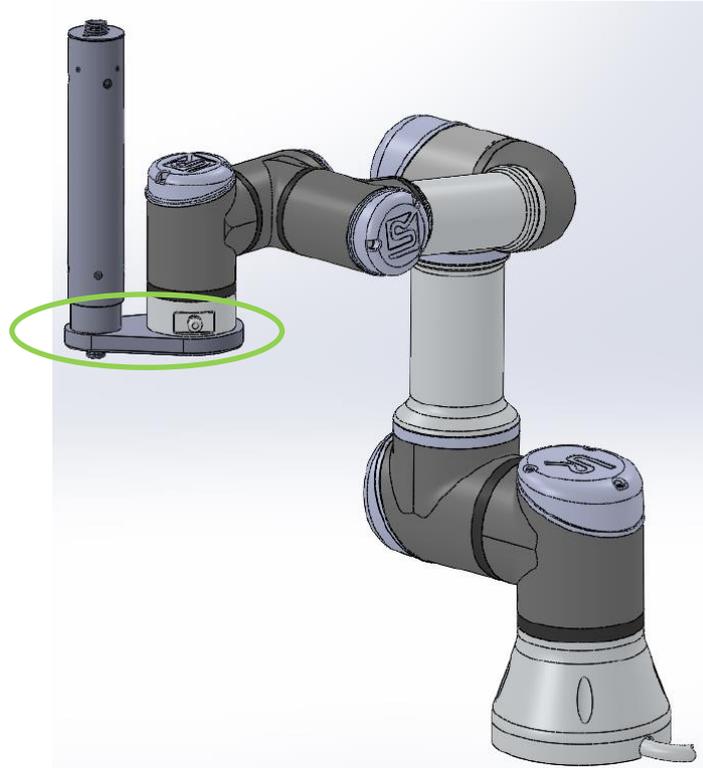

Pistol screwdrivers can be purchased with either bottom or top mounted female cable connector:

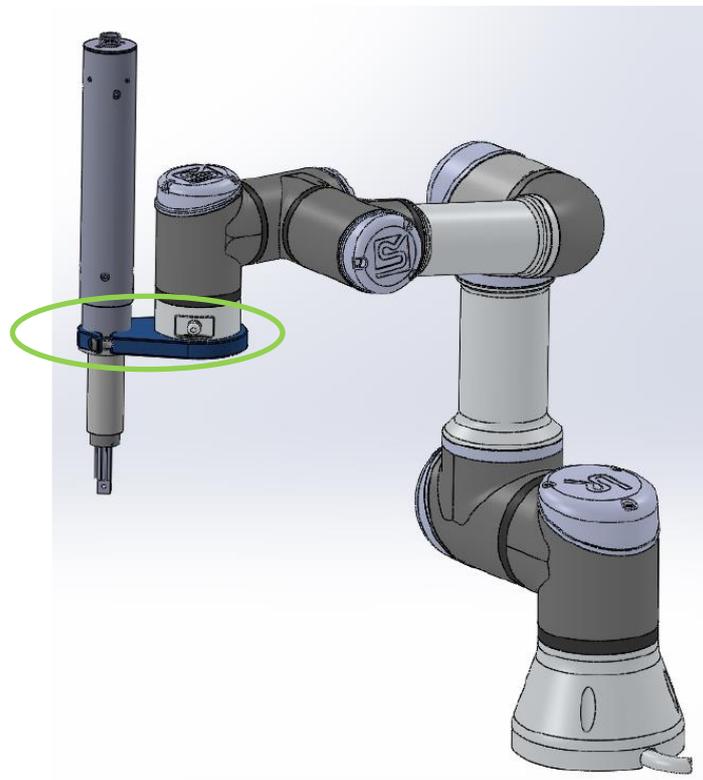

## Pistol screwdriver holder Cod 010175

## Fixing plate for UR Robot KDS xxCA Cod 010695/UR

## Fixing plate for UR Robot KDS xxCA/FN (with flange max diameter 37mm) Cod 010695/URN

## Suction heads

Code	Description
010119	ASP HD8 SUCTION HEAD MITO
010119/UNI	ASP HD8 SUCTION HEAD MITO WITH TUBE
010121	ASP HD9 SUCTION HEAD PLUTO

## GUARANTEE

This KOLVER product is guaranteed against defective workmanship or materials, for a maximum period of 12 months following the date of purchase from KOLVER, provided that its usage is limited to single shift operation throughout that period. If the usage rate exceeds of single shift operation, the guarantee period shall be reduced on a prorata basis. If, during the guarantee period, the product appears to be defective in workmanship or materials, it should be returned to KOLVER or its distributors, transport prepaied, together with a short description of the alleged defect. KOLVER shall, at its sole discretion, arrange to repair or replace free of charge such items.

This guarantee does not cover repair or replacement required as a consequence of products which have been abused, misused or modified, or which have been repaired using not original KOLVER spare parts or by not authorized service personnel.

KOLVER accepts no claim for labour or other expenditure made upon defective products. Any direct, incidental or consequential damages whatsoever arising from any defect are expressly excluded.

This guarantee replaces all other guarantees, or conditions, expressed or implied, regarding the quality, the marketability or the fitness for any particular purpose.

No one, whether an agent, servant or employee of KOLVER, is authorized to add to or modify the terms of this limited guarantee in any way. However it's possible to extend the warranty with an extra cost. Further information at [kolver@kolver.it](mailto:kolver@kolver.it).
